

November 4, 2016

Dear Valued Customer:

You are receiving this letter to notify you of upcoming work near your property along Beverly Road, Yubas Ave. and Marter Ave., in Burlington, NJ.

The highlighted map below indicates where underground trenching is required as part of a transmission upgrade in your area. The trenching will occur in the county / utility right-of-way. Some sidewalks and resident's driveways have been built over the right-of-way and will be impacted by our work. All damaged sidewalks and driveways will be restored in kind at the end of the project. The trench work will enable installation of new and upgraded conduit and manholes to ensure safe and reliable electric service to you, our customers.

Work is expected to begin on / around November 7th and continue through mid December, approximately 5 weeks. We will not be working on Thanksgiving Day. PSE&G will accommodate drive-way access and access to school buses at all times. If work is underway in front of your home and driveway and you need access, please ask the site supervisor or police officer and he/she will ensure you have safe access. There may be brief intermittent lane closures on Beverly Road. Marter Ave. will be closed while we install conduit and Yubas Rd. will be closed while we install conduit and a precasted manhole. Please follow all traffic control and detour signs.

No planned electric outages are required to complete this work.

Safety is our primary concern. To ensure safe traffic conditions and minimize any traffic concerns or inconveniences, all traffic control and road closures will be coordinated by the Burlington Twp. Police Department. Work hours will be 7AM to 6PM Monday through Friday and 8AM to 6PM on Saturdays. During the installation of the manhole on Yubas Rd., we may need to work later hours. During construction, please ensure all children and pets remain a safe distance from our construction work zones.

PSE&G appreciates your patience and cooperation. Any questions about this project can be directed to PSE&G's Electric Utility Upgrade contact number: 1-800-606-0045. In the event of an actual emergency please call the PSE&G Customer Service toll free number at 1-855-249-7734.

Sincerely,
Joseph W. Barton, PSE&G: Project Public Affairs
