Director Department of Engineering

## **NOTICE TO RESIDENTS**

On or about December 4, 2017, D'Erasmus Excavating, LLC, will begin work for Burlington Township on a Water Main Replacement Project. **The project consists of the construction of a new 8" water main and replacement of individual services within the roadway area along Lake Avenue between 14<sup>th</sup> and Mill Road and along 14<sup>th</sup> Street from Lake Avenue to Boudinot Avenue. Work will also take place on Haven Lane between Amherst Drive and Braxton Lane. The work should take 2-3 months to complete.**

The Project will involve the temporary shutdown of water service to your area. It is important to note that your service will not be affected other than for a short period of time; and in all cases, will be restored by the end of the work day. There will be other short-term traffic disruptions, warning signs and parking restrictions that shall be posted and coordinated with the Police Department. Roadways will remain open to local traffic and we will make every effort to minimize possible inconveniences to you and your neighbors.

New Jersey State Law requires that underground public utility lines and facilities in your neighborhood and on your property be marked prior to digging. The location of such lines is marked with color-coded spray paint or flags. Any alteration or removal of markings or flags is prohibited until all work is completed. All disturbed areas will be restored to their original condition.

Thank you for helping us to complete our work safely and efficiently. If you have questions regarding the Burlington Township Water Main Project please contact the Township Engineering Department at 609-239-5836.

Very truly yours,

Scott Hatfield, PE, CME
